# 2 Building Bayesian Network

Please refer to Tutorial\_4\_Bayesian\_Networks.pdf. I will explain it in class.

### 3 Tasks

#### 3.1 Burglary

- A burglary can set the alarm off
- An earthquake can set the alarm off
- The alarm can cause Mary to call
- The alarm can cause John to call

Note that these tables only provide the probability that  $X_i$  is true.  
(E.g.,  $\Pr(A \text{ is true} | B, E)$ )  
The probability that  $X_i$  is false is 1- these values

Please code to calculate:

1.  $P(A)$
2.  $P(J\bar{M})$
3.  $P(A|J\bar{M})$
4.  $P(B|A)$
5.  $P(B|J\bar{M})$
6.  $P(J\bar{M}|\bar{B})$

```
P(Alarm) =
0.002516442

P(J&&~M) =
0.050054875461

P(A | J&&~M) =
0.0135738893313

P(B | A) =
0.373551228282

P(B | J&&~M) =
0.0051298581334

P(J&&~M | ~B) =
0.049847949
```

本次实验较为简单，只要仔细地敲好字符串值即可，主要发现的问题是 used 要大写到 Used，运算结果如下图所示。
